

Three distinct directions for a more polished, more intentional Market Intelligence.

Each direction is a full system — not just a homepage — shown across the five core pages (Homepage, Markets, Forecasting, Model Portfolios, Fund Search). Anchor them against the current site: stronger nav, clearer page hierarchy, consistent cards, and a real brand voice.

A · Editorial / Premium FT / CNBC Pro lineage — serif display, hairline rules, news-first hierarchy.	B · Terminal / Data-dense Bloomberg Terminal / Koyfin — compact sans+mono, rule-based panels, ⌘K command.	C · Executive / Client-facing ★ Addepar / Koyfin Pro — navy masthead, disciplined cards, soft semantic chips.

MACRO · EPM DAILY BRIEF

Fed minutes signal patience on cuts as services inflation stays sticky.

EPM RESEARCH · 14M AGO · 5 MIN READ

[LEAD EDITORIAL PHOTO — 16:9]

The latest minutes reveal a committee unwilling to declare victory, with several members citing residual strength in shelter and medical services. Our base case holds: one cut in September, a second in December, contingent on a softer labor print.

Forecasting

Our house views across growth, inflation, rates, and earnings — updated monthly, benchmarked against consensus.

MACRO

Patient, not pivoting.

Real GDP tracks 2.3% into Q2 on firm services consumption and a bottoming goods cycle. Core PCE decelerates to 2.45% by year-end, below consensus at 2.60%, giving the Fed room for two cuts in H2.

DIRECTION C ★

Executive / Client-facing

Navy masthead for brand carry-over, cool off-white canvas, disciplined cards with a single shadow token, soft up/down chips. Modern but credible, and scales from analyst density to client surface.

RECOMMENDATION

Lead with **Direction C — Executive / Client-facing**, borrow A's typographic gravitas for research content, keep B as a power-user mode.

WHY C WINS

It's the only direction that scales from internal EPM analyst to external client without rebuilding. Cards are consistent, the navy masthead carries EPM brand equity, and pills keep the page calm as data density rises.

BORROW FROM A

Serif display for research titles, commentary, and quote callouts — only there. Kicker eyebrows with uppercase tracking for section hierarchy. This gives EPM voice without losing product clarity.

BORROW FROM B

A "Dense" toggle on Markets / Watchlists — same data, compact rows, mono numerics, ticker-first. Keep the ⌘K command bar as a global shortcut. Power features without compromising the executive surface.

SHARED FIXES — APPLY REGARDLESS OF DIRECTION

Nav. One horizontal tier; utility in secondary strip; no overflow.

Page hierarchy. Eyebrow + title + subtitle + section header pattern on every page.

Cards. One component, three variants: KPI, panel, table.

Spacing. 4/8/16/24/40/56 scale only.

Numerics. One mono family for all tabular numbers.

Delta color. Paired soft up/down chips — not raw text.

Tables. One skin: 11px uppercase header, 13–14px rows, hairline dividers.

Brand. Logo mark + single accent, appearing once per page.
